Using the dating system of Life Time Astrology, the birth chart often shows when critical health problems were and are likely to originate during one's life. It also provides clues to their re-balancing. In Life Time Astrology one can often discover and work with the influences from conception, through gestation until birth. Psychotherapy and other energetic, emotional or physical forms of therapy can be creatively combined to effect centering and support the healing process.

Our important inner and outer events can be dated accurately by using a transparent overlay of the unique time scale and the physical and psychological interpretation of those events is "Your Story." Life unfolds in four 'octaves' of development: Gestation is our genetic and karmic inheritance in the creation of our physical body within our mother. Childhood begins with Birth and describes the creation of our personality and emotional body within our family system. Maturity describes our relationships with partners and the world as we create a mental body. Transcendence is our ability to reach beyond ourselves to empower our creativity and recognize our higher, transpersonal reality.

In the workshop, we will introduce Life Time Astrology in such a way that enables one to identify potential weaknesses or vulnerabilities, health issues, their planetary correspondences,

and even a general key recommending therapies for work on deep-seated life issues and their resultant problems. Using a Wheel of Therapies correlates healing mechanisms with stages of your life process.

Send your birth chart data in advance to atmann@atmann.net. This includes name, date, time and place of birth.

There will be a lunch break and a tea break during the class.
