Life Time Astrology Wheel

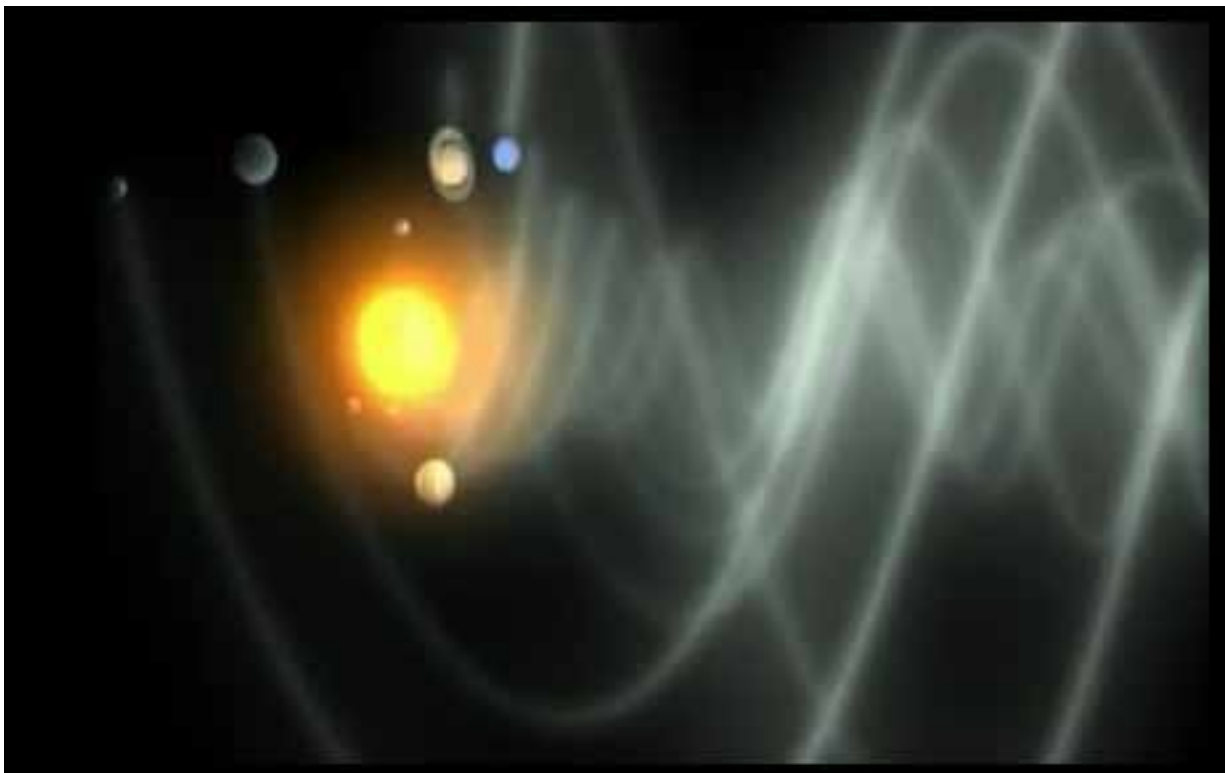

Life is divided into four octaves: Gestation, Childhood, Maturity and Transcendence. You can date when in life planets and house cusps "register" by using the wheel above. Gestation (physical body) is from C9 to birth(ASC); Childhood (emotional body) is from ASC to C5; Maturity (mental body) is from C5 to or beyond C9, the archetypal death and conception point. Gestation has a double function because it is also the fourth Transcendent or Transpersonal octave, where we manifest our drive to express the true Self beyond the physical world. This diagram shows the archetypal position of house cusps and octaves. An actual horoscope using Placidus houses has its own unique transition times between houses' and signs'.

The Cylinder of Life

Our astrological life in time is lived through a symbolic cylinder beginning at conception. As we age the cylinder fills up with memories and experiences. Planets register at certain levels of the cylinder and aspects connect them through the timeless centre of the horoscope. The movements of the planets spiralling through the cylinder makes a pattern that resonates with the genetic molecule DNA.
